

Detectable Cable Tie Mounting Bases

Reduce contamination risks in food and beverage processing facilities

The Ty-Rap® line of detectable cable ties now includes a range of mounting bases that incorporate the same unique, patented compound that is detectable by both x-ray equipment and metal detectors.

- Standard nylon or polypropylene versions
- Easy to spot – bright blue colour immediately visible
- Buoyant polypropylene version ideally suited for liquid processing environments
- One-piece molding eliminates risk of lost parts
- May aid companies to meet Canadian Food Inspection Agency (CFIA) regulations

Ty-Rap® detectable cable tie mounting base

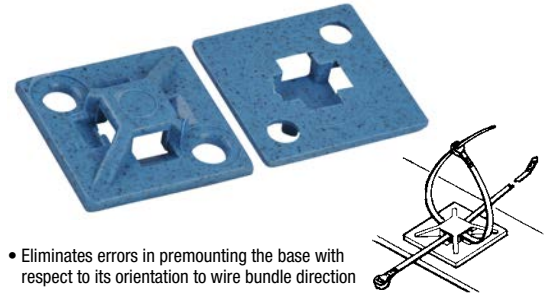

- One-piece molding for no lost parts
- An adhesive back with pressure-sensitive adhesive tape to quickly and securely mount the base

- Eliminates errors in premounting the base with respect to its orientation to wire bundle direction

- This mounting base provides a saddle for the wire run
- Ty-Rap® detectable cable tie can be threaded under bundle and tied in the usual manner

* SRA = Synthetic Rubber Adhesive
 Storage/Surface Temp: 0°C to 48°C (32°F to 120°F)
 Application Temp: 18°C to 37°C (65°F to 100°F)

Surface preparation: Surface should be cleaned with alcohol-based cleaner before application.

Installation: Surface must be clean and dry prior to application of mount. Allow 15 minutes setting time for maximum adhesion performance of synthetic rubber adhesive.

Note: See product expiration date on package. Periodically check product for adhesion and replace as needed. Product is for wire management only and is not intended for use as a primary support of wire, cable, etc.
