Strut Fastener**

## Trapnut™ Strut Fastener

### Features and Benefits

The unique scissor action of the Trapnut™ Strut Fastener closes at any desired position on the threaded rod. Once closed, precision threads trap the threaded rod for a sturdy hold that can be adjusted up or down for fine-tune positioning. While the versatile Trapnut™ has a locking pin that holds it in the desired position, it can also be removed and reused.

Unlike a Hex Nut, there is no need to thread the Trapnut™ from either end of the rod, saving valuable time on the job. While the Trapnut™ Strut Fastener is a time-saver for new construction, it is invaluable for retro-fit applications. Rather than disassembling an existing trapeze to run additional conduit above it, Trapnut™ can be clamped between the existing trapeze and the beam clamp for a speedy retro-fit solution. It's ideal for applications where the rod ends are not accessible.

Trapnut™ has a sturdy steel construction that is load bearing, so you can be confident of a solid installation. And, Trapnut™ functions as a Hex Nut, square washer and flat washer combined, so there are fewer parts to keep up with on the job.

*H 122 3/8 Trapnut™ Strut Fastener Galvkrom™*

## Easy to Install

### ***Hold in the open position.***

- No need to thread Trapnut™ from either end of the rod — saving valuable time
- Perfect for retro-fit applications where the rod ends are not accessible

### ***Insert the bottom plate on the rod and close the top plate.***

- Precision threads trap the threaded rod for a sturdy hold that can be adjusted up or down for fine-tune positioning
- Functions as a hex nut, square washer, and flat washer combined

### ***Press the pin with pliers.***

- Locking pin holds it in the desired position
- Can be removed and reused

### ***Tighten to the desired position with pliers.***

- Can be adjusted up or down for fine-tune positioning
- Sturdy steel construction that is load bearing

# Trapnut™ Strut Fastener

The unique scissor action of the Trapnut™ allows it to be positioned anywhere on the threaded rod.

Standard installation requires manual threading of bolt on threaded rod.
