# **Carflex one-piece liquidtight fittings**

Product overview

# Unique design

The simple, one-piece body design of the Carflex one-piece liquidtight nonmetallic fitting requires no disassembly of components for installation. The system is so strong that there is no need for a compression nut.

### **PVC** construction

PVC construction of the fitting and locknut provides unparalleled protection from water, oil and dust. Totally nonmetallic, the system is non-conductive and will not corrode or rust. Temperatures up to 60 °C

### **Features**

- Approved for indoor and outdoor locations
- · Listed for "wet locations"

# Carflex one-piece liquidtight fittings

# Installation instructions

## LT43C-CAR, LT43F thru J, LT20C-CAR, LT20F thru J

- Cut the end of the Carflex conduit or Carflex X-Flex tubing square.
- 2. Install compression nut and sealing gland ring over the end of the conduit or tubing.
- 3. Insert the ferrule end of the fitting into the conduit using a clockwise twisting action.
- 4. Screw fitting body into compression nut.
- 5. When installation is completed, use a wrench, tighten compression nut one-quarter (¼) turn past hand-tight. Do not over tighten fitting.

To prevent damage to conductors, conduit and fittings, do not twist Carflex during installation.

### LT43D-NEW, LT43E-NEW, LT20D-NEW, LT20E-NEW

- Cut the end of the Carflex conduit or Carflex X-Flex tubing square.
- 2. Install compression nut over the end of the conduit or tubing.
- Insert the ferrule end of the fitting into the conduit using a clockwise twisting action.
   (Be sure conduit is fully inserted to the bottom of the fitting shoulder).
- 4. Screw compression nut onto fitting body.
- Use a wrench, and tighten compression nut one (1) full turn past hand-tight. Do not over tighten fitting.

To prevent damage to conductors, conduit and fittings, do not twist Carflex during installation.

## Liquidtight conduit technical information

- There shall be no more than the equivalent of four (4) quarter (90°) bends (360° total) between pull points, conduit bodies and boxes.
- 2. The radius of the curve of the center of the conduit or tubing shall not be less than that shown in the table below:

Size of conduit or tubing	·	Radius to center of conduit or tubing			
Inches	mm	Inches	mm		
3/8	14	4	101.6		
1/2	16	4	101.6		
3/4	21	41/2	114.3		
1	27	5 <sup>3</sup> ⁄ <sub>4</sub>	146.0		
11/4	35	71/4	184.1		
1½	41	81/4	209.5		
2	53	91/2	241.3
